

SEMINARIOS GIS SYSTEM SOLUTIONS TO SUPPORT THE MUNICIPALITIES OFFICES

DÍA 11 DE MAYO 2016

A LAS 9:30-11:20 AULA 104

A LAS 18:30-20:20 AULA 403

Impartidos por el Dr. Eng. Tomasz Salata: Ph.D., Lecturer in Geographical Information System de la Universidad de Rolniczy en Cracovia (Polonia), Departamento de Ingeniería de Medio Ambiente y Geodesia.

My lectures proposal will in the theme “GIS system solutions to support the municipalities offices” will be focused at the polish law regulation after INSPIRE European Directive was developed. The main goals of the GIS used in low level of self-government will be talked about, and I’ll present process of creation GIS for: street naming and renumbering address points on the villages, waste control managing system in the households, road evidence GIS systems and others application. I will try to explain why to develop this solutions in the communities I used an open source environment.

- Pueden asistir alumnos de todos los cursos de Grado, Máster y Doctorado.
