

## 3D LASER SCANNING - UAV

### Digitization and spatial analysis of the archaeological record of the Middle Paleolithic Site of Jarama (Valdesotos, Guadalajara, Spain)

Combining terrestrial Laserscanning, LIDAR and UAV

1<sup>th</sup> - 15<sup>th</sup> september 2018

Prof. Dr. Mercedes Farjas Abadía, Prof. Dr. Jesús Jordá, Dipl.-Ing. Carlos Acevedo Pardo and Prof. Dr. Thomas Schramm  
Universidad Politécnica de Madrid, Universidad Nacional de Educación a Distancia, HafenCity University Hamburg

This work is done within the following projects: HAR2015-65649-C2-2-P (MINECO/FEDER) and S2015/HUM-3377(CAM/FEDER)

#### TOPICS

1. Introduction in the archaeological-paleontological deposit of Jarama and in the theory of laser scanner and UAV surveys
2. Evaluation and design of an overall concept for the project
3. Survey: GNSS-Georeferencing and terrestrial measurements, laser scanner and UAV survey
4. Data processing
5. Fusion of laser scanner and UAV data
